	R-Type	J type	J type
Program Instructions	50×10^6	30×10^6	20×10^6
Required Cycles	2	4	3
Number of Cycles	100×10^6	120×10^6	60×10^6

I wanna Improve I type. Number of Cycles is the highest
I type. So Improve I type will be more effect program
more than the others

CPU clock time $\quad 280 \times 10^6 . CP$

After Improvement $\quad I$ type 60×10^6

CPU clock time $220 \times 10^6 . CP$

$$\frac{280 . 10^6 . CP}{220 . 10^6 . CP} = 1.28 x$$
